TITLES AND KEYWORDS

A
absolute viscosity 208
absorption 398, 627
acceptor 871
activated carbon 253
activated sludge 719
activity coefficients 842
air entrainment 228
airlift reactor 336
alkene 330
alkylsulphuric acid 206
alloy development 771
Analysis of flow in gas-liquid bubble columns using multi-resolution methods, Bakshi, B.R., Zhong, H., Jiang, P. and Fan, L.-S. 608
Analysis of liquid flow distribution in trickling flow reactor using computer assisted X-ray tomography, Toye, D., Marchot, P., Crine, M. and L'Homme, G. 258
Analysis of the effect of rheology on local gas hold-up: the case of thylosin production, An, Vlaev, S.D., Mann, R. and Lossev, V. 320
analytical solutions 817
Annular flow in a catalytic monolith reactor: the significance of centreline probe temperatures, Rankin, A.J., Hayes, R.E. and Kolaczkowski, S.T. 110
antibiotics production 320

antioxidation 69
Applying basic understanding of heat exchanger network behaviour to the problem of plant flexibility, Picon Nunez, M. and Polley, G.T. 941
Appropriate placement of energors against local pinch temperatures, Homšak, M. and Glavič, P. 871
aqueous solutions of electrolytes 341
AspenPlus 3
asymmetric membranes 782
augmented diffusivity 130
automated heat exchanger network 919
autoxidation 59, 69
axial dispersion 286, 707, 745
axial mixing 33, 492
axisymmetrical jet 191

B
back flow model 669
backmixing 217
baffled tube 727
baffles 78
batch design 931
batch process design 905
batch processes 431, 931
bed voidage 473
binary mixtures 263, 551
Biological phenol degradation by immobilized activated sludge in gel bead with three-phase fluidized bed bioreactor, Shishido, M., Kojima, T., Araike, Y.-K. and Toda, M. 719
breakthrough curve 40
bromine 330
bubble and drop curvature 519
bubble and drop interference 519
bubble coalescence 341, 739
bubble columns 217, 269, 291, 297, 302, 308, 608, 615, 637, 649, 669, 690, 697
bubble column jet 676
bubble column reactor 341
Bubble-particle interactions in three-phase fluidised beds: effect of bed voidage, Lee, J.C., Alkaisi, A.-H. and Al-Saigh, A.M.J. 739
bubbles 228
bubble size distribution 291, 649
bubbling regime 234, 341
bypass 13

C
CAO 953
calcium carbonate 241
calcium sulphate 854
calculation 87
carbon dioxide absorption 649
catalyst 136
catalyst loading 637
catalytic combustion 110, 168
Catalytic stationary gas turbine combustors: a review of the challenges faced to clear the next set of hurdles, Kolaczkowski, S.T. 168
catalytic wet oxidation 314
cell model 690
centrifugal reactor 325
Ceramic and metals development - a selective overview, Blackburn, S., Johnson, T.P., Ponton, C.B. and Wise, M.H.L. 771
ceramics 771
CFD 595
channelling 833
chemical and biochemical reactors 320
chemical process design 880
chemical reaction fouling 59
choking 154
circulating fluidization 162
circulating fluidized beds 154
circulation time distribution 78
coalescence 654
Coanda effect 676
coarse particle hydrodynamics 473
coarse particles 162, 473
co/counter current 567
combinational method 915
cogeneration 967
coke 136
combustion 142
Comparative analysis of the factors affecting small and medium scale gas turbine cogeneration in Australia and the UK, Prince, R.G.H. and Poole, M.L. 967
complex rheology 320
compression 833
Computer-aided method for the interaction parameter calculations, Meniai, A.H. and Newsham, D.M.T. 842
concentrated dispersions 519
concentration 826
consolidation 810
continuous-batch reaction 363
Continuous-phase axial dispersion in a Wirz extraction column, Rincón-Rubio, L.M., Kumar, A. and Hartland, S. 33
control 753
convective model 302
correlation 208
corresponding states 582
cost 974
counter/co-current 567
Critical evaluation of the use of absorption mass transfer data for the design of packed distillation columns, A, Linek, V., Sinkule, J. and Brekke, K. 398
critical velocity 154
crossflow 20, 162
crossflow filtration 782
crude oil fractions 87

D
debottlenecking 941
decomposition 854
Deep filtration of liquids at nonconstant velocity in fibre layers. Part I: description of the model, characteristics and analytic solutions for the initial stage, Čerňanský, A. 817
Deep filtration of liquids at nonconstant velocity in fibre layers. Part II: numerical solutions for the advanced stage, $t > 0$, Čerňanský, A. 826
deep U tube 627
dehydration 559
dense phase 217, 308
design 320
design flexibility 931
Determination of the steady state response of heat exchanger networks without simulation, Picon-Nunez, M. and Polley, G.T. 49
diffusion battery 142
dilute phase 217
dimensional correlation 622
disperse phase systems 519
dispersion structure 512
distillation 3, 13, 363, 379, 385, 398, 953
distributor 676
donor 871
draft tube 535
drift-flux 336
drift-flux analysis 679
dual impeller 535

E
economics 967
eddy diffusivity 406
effective thermal conductivity 280
Effect of electrolytes on bubble coalescence and gas holdup in bubble column reactors, The, Zahradnik, J., Fialova, M., Kastánek, F., Green, K.D. and Thomas, N.H. 341
Effect of impeller and tank geometry on circulation time distributions in stirred tanks, The, Roberts, R.M., Gray, M.R., Thompson, B. and Kresta, S.M. 78
Effect of inlet weeping on distillation tray efficency, The, Billingham, J.F., Banik, S. and Lockett, M.J. 385
Effect of surface tension on gas/liquid contacting in a mechanically-agitated tank with stator, Al Taweel, A.M. and Cheng, Y.H. 654
efficiency 385

Efficiency improvement of a tubular jet reactor by mixing increase, Duquenne, A.M., Guiraud, P. and Bertrand, J. 191
efficiency of absorption 392
Electrical model for coalescers that employ pulsed DC fields, An, Bailes, P.J. 559
electrochemical masss transfer 196
electrochemical reactor 330
electrofiltration 455
electrolytes 643
electrolyte solutions 464
electrostatic coalescence 559
emulsion breaking 559
energy 871
Energy dissipation in oscillatory flow within a baffled tube, Baird, M.H.I. and Stonestreet, P. 503
enhancement factor 253
epitaxial polymerisation 782
epoxidation 330
equations of state 464, 582
equilibria 701
Estimation of the viscosity and density of lauryl alcohol/laurylsulphuric acid mixtures as a function of temperature and laurylsulphuric acid molar fraction, Talens, F.I. and Gutiérrez, J.M. 206
Evaluation of neural networks for simulation of three-phase bubble column reactors, Leib, T.M., Mills, P.L., Lerou, J.J. and Turner, J.R. 690
Experimental study of channelling and solid concentration during the batch sedimentation of calcite suspensions, Holdich, R.G. and Butt, G. 833
experimental techniques 615
experimented comparison 512
extraction column 33
extruder 27
extrusion 810

F
fabrication 771
fast reactions 497
feasibility 967
fibre layers 817, 826
filter cake 551
filterpress reactors 196
filtration 817, 826
finite element 110
Fischer-Tropsch 632, 690
fixed bed 40
flexibility 941
Flexibility versus costs in multiproduct batch plant design: a calculation algorithm, Tarifa, E. and Chiotti, O. 931
Flooding of rotating structured packing and its application to conventional packed columns, Lockett, M.J. 379
flotation columns 733
flow modes 154
Flow patterns in a slurry bubble column reactor under reaction conditions, Toseland, B.A., Brown, D.M., Zou, B.S. and Dudukovic, M.P. 297
flow rate constraints 889
flow transition 222
Flow visualization of high pressure (21 MPa) bubble column: bubble characteristics, Jiang, P., Lin, T.-J., Luo, X. and Fan, L.-S. 269
fluidization 154, 473, 661
fluidized bed expansion 473
fluidized beds 217, 246, 308, 632
formation water 464
fouling 59, 69, 445, 455
Fractal analysis of particle trajectories in three-phase systems, Luewisuthichat, A, Tsutsumi, A. and Yoshida, K. 222
freezing point and vapour pressure depression 464
Future challenges in chemical engineering research, Villermaux, J. 105

G
gamma-phase 798
gas 967
Gas density effect on mass transfer in three-phase sparged reactors, Dewes, I., Küksal, A. and Schumpe, A. 697
gas dispersion 739
gas entrainment 685
gases 208
gas hold-up 341, 654
Gas hold-up, liquid circulation and gas-liquid mass transfer in slurry bubble columns, Gavroy, D., Joly-Vuillemin, C., Cordier, G. and Delmas, H. 637
gas holdup structure 697
gas hydrates 464
gas inducing impeller 713
gas induction 234
gas-liquid absorption 325
gas-liquid contacting 654, 707, 713
Gas-liquid flow mechanisms in trickle beds operating in dispersed bubble and pulse flow, Rode, S., Midoux, N. and Storck, A. 275
gas-liquid fluidized beds 347
Gas-liquid mass transfer characteristics of a centrifugal reactor, Chéry, O., Roizard, C., Wild, G. and Midoux, N. 325
gas-liquid mass transfer 745
Gas/liquid mass transfer in concentrated polymer solutions, Zeybek, Z., Oğuz, H. and Berber, R. 622
gas-liquid reaction 649
gas/liquid sieveplate 330
gas-liquid-solid (precipitation, crystallization) 241
gas-liquid-solid reactor 280
Gas-liquid-solid systems: an industrial perspective, Katti, S.S. 595
gasoline quality 849
gas-perturbed liquid model 347
Gas phase hydrodynamics in bubble columns, Hyndman, C.L. and Guy, C. 302
gas turbines 168
General correlation for two-phase pressure drop in intermittent flow of gas and non-Newtonian liquid mixtures in a pipe, A, Dziubiński, M. 528
Gibbs energy minimization 582
Growth of primary soot particles in an atmospheric premixed methane oxygen flame, Sadakata, M., Motegi, M., Mashio, Y., Ishida, T., Harano, A. and Kim, H.J. 142

H
HE-3 and A310 hydrofoils 485
heat exchanger networks 49, 915, 941
heat integration 880, 905
heat recovery 941, 953
heat transfer 280, 661
heavy oils 208
heterogeneous regime 217, 308
high interaction 275
high pressure 269
hold-up 535, 615
hollow fibre membranes 782
homogeneous regime 217, 308
hydrodynamics 217, 258, 269, 275, 280, 302, 308, 542, 608, 637, 661
Hydrodynamics and expansion of fluidized beds of coarse particles, San José, M.J., Olazar, M., Benito, P.L. and Bilbao, J. 473
Hydrodynamics of a plunging liquid jet bubble column, Evans, G.M. and Jameson, G.J. 679
Hydrodynamic study of the riser zone in a three phase airlift (TPAL) reactor, A, Douek, R.S., Hewitt, G.F. and Livingston. A.G. 336
hydrogenation 637

I
image analysis 147
impeller 78
indene 59
Influence of viscosity and foaming properties on heat transfer in packed bed with cocurrent upflow of gas and liquid, Lamine, A.S., Colli Serrano, M.T. and Wild, G. 280
Influence of coke profile on regeneration temperatures in fixed bed reactors, Hughes, R. and Koon, C.L. 136
Influence of different temperature contributions on heat integrated process structure, The, Krajnc, M. and Glavič, P. 880
Influence of intraparticle convection on product distribution for series-parallel catalytic reaction, The, Leitão, A. and Rodrigues, A. 130

Influence of particles concentration on the hydrodynamics of bubble column slurry reactors, de Swart, J.W.A. and Krishna, R. 308
Influence of weeping on mass transfer rate of different plates, Mustafa, H. and Békássy-Molnár, E. 392
injection moulding 798
integral yield 130
interaction parameters 842
interfacial area 654, 707
interfacial charge 559
interfacial phenomena 253
Intermigs 485
intermittence 608
internal circulation 733
internally staged permeator 567
Internal recirculation and mixing in flotation columns, Mavros, P., Daniilidou, A. and Papatsiotsou, F. 733
intrafacial reactions 122
intraparticle forced convection 130
ion exchange 40
ionic redox model 122
ionic strength 701
isothermal tube reactor 863

J
Jet reactor scale-up for mixing-controlled reactions, Baldyga, J., Bourne, J.R., Dubuis, B., Etchells, A.W., Gholap, R.V. and Zimmerman, B. 497
jetting 234
Jet wall attachment in a jet bubble column, Wisecarver, K.D. 676

K
kinematic viscosity 87
Kinetically based NMR method of measuring blending octane number of olefins, Golombok, M., De Bruijn, J.N.H. and Morley, C. 849
kinetic coefficients 817
kinetics 701
Kinetics of the calcium sulphate decomposition, Fuertes, A.B. and Fernandez, J. 854

L
Large bubbles in downward two-phase flow, Bacon, R.P., Scott, D.M. and Thorpe, R.B. 228
Lateral mixing of coarse particles in fluidized beds of fine particles, Bi, J., Yang, G. and Kojima, T. 162
lauryl alcohol 206
light particles 661
liquid holdup 280
liquid-liquid extraction 45, 492, 542
liquid-liquid-vapour equilibria 582
Liquid migration in paste extrusion, Burbidge, A.S., Bridgwater, J. and Saracevic, Z. 810
Liquid mixing on packed sieve trays, Zu, Z.P., Afacan, A. and Chuang, K.T. 406
liquid plunging jet 685
liquids 826
LNG 582
Local particle-liquid heat transfer and hydrodynamics in three-phase fluidized beds with light particles, Galy-Jammou, P., Briens, C., Bergougnou, M. and Large, J.F. 661

M
Management of microstructure in semi-crystalline polymers, The, Kalay, G., Ogbonna, C., Allan, P.S. and Bevis, M.J. 798
Mars-van Krevelen redox model 122
mass transfer 291, 325, 398, 542, 627, 637, 697, 701
mass transfer coefficient 286
Mass transfer in a turbulent bed contactor, Guerriere, R.A., Fayed, M.E. and Matchett, A.J. 246
Mass transfer in multistage slurry bubble column - analysis of back flow model, Tsuge, H., Yamada, T., Teraska, K. and Miyakawa, S. 669
Mass transfer of dilute soluble silica in a fixed bed of an OH-type strong anion exchange resin, Kataoka, T., Muto, A., Kayajima, M. and Nishiki, T. 40
mass transfer with chemical reaction 519
Mathematical modelling and simulation of MTBE catalytic distillation process using SpeedUp and AspenPlus, Abufares, A.A. and Douglas, P.L. 3
Matrix-based heuristic synthesis for production of mixed products via sharp distillation sequences with bypass, Liu Zhi-Yong and Xu Xi-En 13
maximum throughput 707
mean sizes 512
Measurement of drop size distribution in concentrated liquid-liquid dispersions: video and capillary techniques, Pacek, A.W. and Nienow, A.W. 512
Measurement of k_La in multiple-impeller vessels with significant axial dispersion in both phases, Moucha, T., Linek, V. and Sinkule, J. 286
Measurements of velocities of single particles for steady and oscillatory flows in plain and baffled tubes, Liu, S., Ni, X., Greated, C.A. and Fryer, P.J. 727
mechanically-agitated tanks 654
mechanisms 59
membranes 445, 455, 575, 782
mercury porosimetry 147
metals 771
Method for automated heat exchanger network synthesis using block decomposition and non-linear optimization, A, Zhu, X.X., O'Neill, B.K., Roach, J.R. and Wood, R.M. 919
methyl tertiary butyl ether (MTBE) 3
microfiltration 20, 445, 455
minimum fluidization velocity 473
Minimum liquid fluidization velocity of gas-liquid fluidized beds, Zhang, J.-P., Epstein, N., Grace, J.R. and Zhu, J. 347
mixing 78, 191, 320, 535, 733
mixture density and viscosity 206
Model experiments of autoxidation reaction fouling. Part II: effects of flow parameters and antioxidants, Wilson, D.I., Lai, R.C. and Watkinson, A.P. 69
Model experimetns of autoxidation reaction fouling. Part I: mechanisms, Wilson, D.I. and Watkinson, A.P. 59
Model for simulation of hydrodynamics and mass transfer in extraction columns filled with a regular packing, A, Steiner, L., Bertschmann, H. and Hartland, S. 542
modelling 27, 542, 967
Modelling of gas flow from a submerged orifice in liquid cross-flow, Rigby, G.D., Evans, G.M. and Jameson, G.J. 234
Modelling of mass transfer coefficient k_L in bubble columns, Cockx, A., Roustan, M., Line, A. and Hebrard, G. 627
Modelling single and fixed electrolyte solutions and its applications to gas hydrates, Tohidi, B., Danesh, A. and Todd, A.C. 464
Modelling the effect of dissolved gases on the viscosity of heavy oils, Miadonye, A., Singh, B., Huang, S.S., Srivastava, R. and Puttagunta, V.R. 208
Models for mass transfer with chemical reaction in concentrated fluid-fluid dispersions, Suresh, A.K. 519
Modified axial dispersion model applied to three-phase fluidized bed reactors with a transition zone, A, Gervais, A., Briens, C.L., Andre, J.C. and Wild, G. 745
molar volume 582
molecular alignment 798
molecular graphics 842
monolith 168
Monolith froth reactor: residence time modelling and analysis, The, Thulasidas, T.C., Cerro, R.L. and Abraham, M.A. 314
monolith reactor 110
morphology 798
Morphology control in the manufacture of alkaline earth metal carbonates, McShane, J.R. and Rielly, C.D. 713
multifractals 608
multi-phase reactions 595
multi-phase reactors 217, 308, 643
multiple impeller 286
Multistage countercurrent extractor using vortex rings, Latto, B., Ho, S.K., Rama Rao, N.V. and Baird, M.H.I. 45
multistage extraction 45
multistage slurry bubble column 669

N
neural network 690

New combinatorial method for synthesis of heat exchanger networks, Victorov, V.K. 915
Newtonian solutions 622
nonconstant velocity 817, 826
non-Newtonian fluids 20, 228, 528, 863
NO_x 168
numerical solutions 826

O
octane blending 849
OH-type strong anion exchange resin 40
oil and gas 464
On the effects of surfactants on mass transfer to viscous liquids in bubble columns, Muller, F.L. and Davidson, J.F. 291
Operational characteristics of a novel reciprocating plate multiphase contactor, Al Taweel, A.M., Landau, J., Boyle, J. and Gomaa, H.G. 707
Optimal design of spiral wound modules: an analytical method, Avlonitis, S., Sakellaropoulos, G.P. and Hanbury, W.T. 575
optimal scheduling 431
optimization 871, 880, 974
optimization synthesis 919
orientation 753
orifice 234
oscillatory flow 503, 727
oxide 330
Oxygenator for waste water treatment using a staionary bubble cloud in a down-flowing liquid, Moppett, G.D., Rielly, C.D. and Davidson, J.F. 685

P
packed bed 280
packed column 398
packed sieve tray 406
parallel plate cells 196
particle deposition 445
particles 308
particle trajectory 222
particle-turbulence interaction 222
particle velocity 727
Penetration model of the gas-liquid reactive precipitation of calcium carbonate crystals, A, Hostomský, J. and Jones, A.G. 241
penetration theory 241
Performance of a multistage electrochemical sieve plate reactor, Scott, K., Odouza, C. and Hui, W. 330
Performance of co/counter-current and counter/co-current flow patterns in an internally staged permeator for gas separation, Chen, Y.S., Li, K. and Teo, W.K. 567
permeability 817
perovskite oxide catalysts 122
pH 551
phase migration 810
phenanthrene 142
phenol biodegradation 719
Physical and chemical mass transfer enhancement at a gas-liquid interface due to fine catalyst particles, Py, X., Roizard, C., Bergault, I. and Midoux, N. 253
pinch technology 871
pipe flow 528
pipeless plants 431
PIV 727
plate absorber 392
plunging jet bubble columns 679
pneumatic conveying 154
poling 753
polycyclic aromatic hydrocarbon 142
polyethylene 798
polyethylene glycol 622
polyhipe polymer 782
polymer 753
polypropylene 798
population balance equation 649
pore networks 147
pore size distribution 147
porosity 551
powder coatings 27
Power curves and flow patterns for a range of impellers in Newtonian fluids: $40 < Re < 5x10^5$, Ibrahim, S. and Nienow, A.W. 485
power dissipation 286, 503
power draw 535
Prandtl-Eyring fluid 863
precipitation 241, 713
Predicting and calculating complex phase equilibria from equations of state models: a case study of a prototype liquefied natural gas system, Stateva, R.P., Elhassan, A.E., Craven, R.J.B. and De Reuck, K.M. 582
prediction 87
Preliminary design of economically optimal refractories, Gerrard, A.M. 974
premixed methane oxygen flame 142
pressure 27, 208
pressure drop 196, 503, 528
pressure effect 697
Prevention of particle deposition in crossflow microfiltration, Buffham, B.A. and Cumming, I.W. 445
processing 753
process design 941, 953
process optimization 849
process synthesis 13, 953
Properties of filter cake in dead-end ultrafiltration of binary protein mixtures with retentive membranes, Iritani, E., Mukai, Y. and Murase, T. 551
protein 551
pseudo-homogeneous fluid model 347
pulsed columns 492
pulsed DC 559

R
radiation 110
radioactive particle tracking 263
radioactive tracers 297
reaction 753
reaction (crystallization) 241
Reaction kinetics of hydrogen and aqueous sodium and potassium bicarbonate catalysed by palladium on activated carbon, Engel, D.C., Versteeg, G.F. and van Swaaij, W.P.M. 701
Reactive distillation dynamic simulation, Ruiz, C.A., Basualdo, M.S. and Scenna, N.J. 363
reactor 690, 871
reactor engineering 713
reactor model 719
reciprocating plate column 707
rectangular fluidized bed 162
Redox kinetics of CO oxidation over a perovskite oxide catalyst, Petrolekas, P.D. and Metcalfe, I.S. 122
reforming catalyst 147
refractory design 974
regeneration 136
Regime transitions affecting gas-solids suspensions and fluidized beds, Bi, H.T., Grace, J.R. and Zhu, J. 154
regular packing 542
residence time distribution 162, 302, 314
Residence time distribution modelling for co-rotating twin screw extrusion of thermoset powder coatings, Scott, J.A. and Walters, J.T. 27
response equations 49
retrofit 941
reverse osmosis 575
rigorous model 363
rotation 379
Rushton and 45° pitched blade turbines 485

S
saturation solids concentration 154
scale-up 217, 308, 330, 497
Seamless chemical engineering science: the emerging paradigm, Mashelkar, R.A. 413
sedimentation 833
Self-supported porous channel filtration modules: preparation, properties and performance, Akay, G., Bhumgara, Z. and Wakeman, R.J. 782

separation 559
separation schemes 953
Short-term scheduling of pipeless batch plants, Pantelides, C.C., Realff, M.J. and Shah, N. 431
sieveplate 492
sieve tray 406
silica 40
simple and complex networks 49
Simple equation for predicting the viscosity of crude oil fractions, A, Mehotra, A.K. 87
simulation results 363
Single phase axial mixing studies in pulsed sieve plate liquid-liquid extraction columns, Ingham, J., Slater, M.J. and Retamales, J. 492
skin/core formation 782
slurries 20, 697
slurry bubble columns 297, 632, 669, 745
slurry reactors 253, 308
small bubbles 291
smooth tube 727
solid electrolyte potentiometry (SEP) 122
solid phase 753
Solids circulation paterns in three-phase fluidized beds containg bibary mixtures of particles as inferred from RPT, Larachi, F., Cassanello, M., Marie, M., Chaouki, J. and Guy, C. 263
sols 771
solubility parameter 782
solvent effects 59
Some routes for tailoring of polymer properties through processing, Coates, P.D., Davies, G.R., Duckett, R.A., Johnson, A.F. and Ward, I.M. 753
soot growth 142
spargers 228
SPC-modules 782
SpeedUp 3
spiral wound modules 575
steady-state multiplicity 122
steady-state simulation 49
stirred tank/vessel 78, 512
stirring 833
structured packing 379
Studies of an independently-driven, dual impeller protofermenter with and without a draft tube: power and hold-up, John, A.H., Bujalski, W., Nienow, A.W., Sánchez, A., Torres, L. and Galindo, E. 535
sulphur dioxide 253
sulzerpack 542
supported porous channel modules (SPC) 782
surface tension 228
surfactants 291
swirling jet 191
synthesis 915
Synthesis of practical distillation schemes, Rajah, W. and Polley, G.T. 953

T
temperature 208
temperature dependence 206
temperature effects 69, 87
temperature profiles 136
theoretical-plate 398
thermoset 27
three-phase 336, 690
three phase fluidization 263, 347, 739
three-phase fluidized beds 661, 719, 745
three-phase system 222, 701
Time dependent behaviour of the flow in a bubble column, Grien, J.S., Mudde, R.F. and van den Akker, H.E.A. 615
Time pinch analysis, Wang, Y.P and Smith, R. 905
Transient hydrodynamics, mass transfer and reaction in bubble columns: CO_2 absorption into NaOH solutions, Fleischer, C., Becker, S. and Eigenberger, G. 649
transients 512
trays 385
trickle bed 275
trickling filters 258
tubular reactor 191
turbine 967
turbulence 191
turbulent beds 246
turbulent mixing 497
two-fluid model 627
two-phase flow 228, 528, 615, 679

U
ultrafiltration 445, 551
Unified approach to the scale-up of 'fluidized' multiphase reactors, A, Krishna, R. and Ellenberger, J. 217
Upward cocurrent gas-liquid-(solid) contactors: holdup, axial dispersions, gas-liquid mass transfer, Syaiful, S., Wilhelm, A.M., Svendsen, H.F. and Delmas, H. 643
utilities 880
utility system design 905
Utilizing pulsed electric fields in crossflow micrfiltration of titiana suspensions, Wakeman, R.J. and Sabri, M.N. 455

V
Variation of crossflow filtration rate with wall shear stress and the effect of deposit thickness, The, Holdich, R.G., Cumming, I.W. and Ismail, B. 20
velocity effects 69
velocity profiles 727
vertical downflow 228
vertical upflow 336
viscosity 228
viscous liquids 291, 643
Visualised porosimetry for pore structure characterisation of a nickel/alumina reforming catalyst, Mann, R., Al-Lamy, A. and Holt, A. 147
visualization 269
volumetric liquid side mass transfer coefficient 622
volumetric mass transfer coefficient 398
vortex ring 45

W
wall heat transfer coefficient 280
waste water minimization 889
waste water treatment 685, 719
water minimization 889, 905
water pinch analysis 889
wavelets 608
weeping 385, 392
Why research is needed in distillation, Porter, K.E. 357
Wirz extractor 33

X
X-ray imaging of slurry bubble column reactors: the effects of system pressure and scale, Smith, G.B., Gamblin, B.R. and Newton, D. 632
X-ray tomography 258

Z
Zero-order reaction in Prandtl-Eyring model fluids during laminar flow in an isothermal tube reactor, Sawinsky, J., Simándi, B. and Deák, A. 863

BOOKS REVIEWED

Creative trouble shooting in the chemical process industries. D. Saleton (Chapman and Hall) Reviewed by M.G. Kemp 91
Crystallization technology handbook. A. Mersmann (ed) (Marcel Dekker) Reviewed by A.G. Jones 589
Experiments in thermodynamics. R.A. Granger (ed) (Cambridge University Press) Reviewed by P.B. Whalley 480
